Re: Video Editor Application

Dear Hiring Manager,

I am applying for Video Editor opportunities with your team. My experience spans short-form, long-form, podcast teaser, promotional, product, event, and social media content, with end-to-end ownership from raw-footage organization through final export. I focus on clear storytelling, purposeful pacing, brand consistency, and production quality.

At Globussoft, I manage project-based production cycles and deliver, depending on format and complexity, up to 60 short-form videos, 15 long-form videos, or 13 podcast teaser videos in a monthly cycle. I have edited high-performing digital content, including individual videos reaching 2.2M+ and 888K+ views. I collaborate with marketing and product teams and handle motion graphics, kinetic typography, color grading, sound design, captions, revisions, and platform-ready exports.

My core toolset includes Adobe Premiere Pro, After Effects, Photoshop, and DaVinci Resolve. For TEDxBITD, I directed three-camera coverage for speakers and performances, synchronized multi-channel audio, integrated slides and TEDx branding, and delivered polished multi-camera edits. Leading cinematography at TechnoHub BITD further strengthened my ability to coordinate camera, lighting, and post-production workflows. I am also comfortable using AI-assisted creative tools when they add value without compromising editorial quality.

I would welcome the opportunity to bring reliable delivery, visual judgment, and audience-focused editing to your team. My portfolio is linked above, and I would be glad to discuss how my experience can support your content goals. Thank you for your time and consideration.

Sincerely,

Yogesh Banjare
